Quick drying primer, based on modified alkyd resins, with excellent anticorrosive protection. It provides the perfect substrate for enamels used on metallic surfaces, presents exceptional adhesion, hiding power, elasticity and excellent levelling.

- Quick drying primer
- High anticorrosive protection

**COLOURS**
Available in brown and grey.

**PACKAGING**

<table>

**SPREADING RATE**
12 - 14 m²/L per coat on properly prepared surfaces.

**VOC (Volatile Organic Compounds) CONTENT**
EU maximum VOC content limit values (Directive 2004/42/CE) for this product (category A/i “One-pack performance coatings”, Type SB): 500 g/L. This product contains maximum 449 g/L VOCs (ready for use product).

**SURFACE PREPARATION**
Surfaces should be cleaned with Brush Solvent T 300, be smooth and dry, free from dust, grease or rust and abraded.

**APPLICATION**
Stir well before use. Apply one or two coats by roller or brush diluted up to 5% with Brush Solvent T 300 or airless spray gun diluted up to 5% with Spray Gun Solvent T 350. Do not apply at temperatures below 5°C, above 35°C and/or relative humidity above 80%. It is touch dry after 45-60 minutes and can be recoated after 20-24 hours. When the coating is thoroughly dry, sand with an appropriate abrasive paper to produce a smooth surface, remove the dust and then apply any Vitex’s enamel water based or solvent based paint. Drying time depends on weather conditions (humidity and temperature). Clean rollers, brushes, floor stains, etc. with Brush Solvent T 300 and then with soapy water or detergent. Use Spray Gun Solvent T 350 to clean spray guns.

**TECHNICAL CHARACTERISTICS**
