Vista Plus

Antibacterial Emulsion Paint with Silver Ions

Vista Plus is an Antibacterial mat emulsion paint with silver ions for interior use. It provides great hiding power and coverage. Due to its special formulation, Vista plus reduces 99,99% the growth of bacteria (E.Coli and Staphylococcus aureus) on the painted surfaces.

- 3L, 9L, 15L
- White and unlimited number of shades through Vitex Coloring System

13-16 m²/L depending on the thickness of the layer and the absorbency of the surface

- With Water:
- Up to 10% for application with roller, brush or airless spray gun

In sealed containers under proper storage conditions 5°C- 38°C

APPLICATION INSTRUCTIONS

- 1 Surfaces should be clean, dry and smooth, free from dust, grease and loose or flaking paint. To fill any cracks or holes use Acrylic Putty or Visto
- 2 Surfaces previously covered with water paints or distempers (lime wash or ceiling white) should be primed with Acrylan Unco Eco or Durovit. New surfaces made of plaster, concrete, cement, plasterboard, etc. should be first primed with 100% Acrylic Primer or Acrylan Unco Eco. Surfaces stained from smoke, graffiti, coffee or any other kind of stain should first be primed with Blanco Eco or Vitosin.
