Application

- Step 1**
 Dilute 8-10% with water and stir well before use
- Step 2**
 Apply the first coat by brush, roller or airless spray gun
- Step 3**
 Recoat after 3-4 hours

Technical Characteristics

- Coverage**

One coat
 13-16 m²/L
 
Two coats
 7-8 m²/L
- Drying time**

Touch dry
 30-60 min
 Recoat
 3-4 h

Preparation

- Surfaces should be smooth, clean and dry, free from grease, dust, loose or flaking paint. To fill any cracks or holes use **Acrylic Putty** or **Visto**.
 
- Old surfaces previously covered with water paints should be primed with **Acrylan Unco Eco** or **Durovit**. New surfaces made of plaster, concrete, cement, plasterboard, etc. should be first primed with 100% **Acrylic Primer** or **Acrylan Unco Eco**. Surfaces stained from smoke, graffiti, coffee or any other kind of stain should first be primed with **Blanco Eco** or **Vitosin**.
 
- For maximum opacity in dark and intense (such as blue, red and yellow) final shades, it is recommended to apply one coat of **PreColor Primer** colored - depending on the final shade - through **Vitex Coloring System**.
