

VISTA PLUS

Antibacterial Emulsion Paint with silver ions

Antibacterial mat emulsion paint with silver ions for interior use. It provides great hiding power and coverage. It is easy to apply with very good levelling properties offering a smooth flat surface. It is suitable for walls, ceilings, storage units and areas that need frequent painting. Certified by the Industrial Microbiological Services Ltd (IMSL, UK) for its antibacterial activity according to ISO 22196 (Certificate No: IMSL2020/09/053.2B).

Vista Plus due to its special formulation prevents the growth of bacteria on the painted surfaces. Reduces 99,99% bacteria (E.Coli and Staphylococcus aureus) on the painted surface, so it is ideal for areas that require more aseptic surfaces and hygienic conditions such as children's rooms, hospitals, maternity clinics, surgical clinics, doctor's practices, schools, kindergartens, gyms, hotels, food storehouses e.tc.

Microbiologically tested

It is a Biocidal product according to Regulation EU 528/2012 (BPR) and is subjected to authorization or proper notification.

Advantages:

- Antibacterial activity
- Great hiding power and coverage
- Easy application and levelling

PRODUCT FEATURES

TECHNICAL CHARACTERISTICS

Viscosity

110 ± 10 KU (ASTM D 562, 25° C)

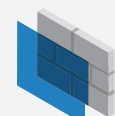

Density

1,63 ± 0,02 Kg / L (ISO 2811) for white

Gloss

< 10 units @ 85° (ISO 2813)

COVERAGE

One coat

13-16 m²/L

Two coats

7-8 m²/L

PACKAGING

White	3 L	9 L	15 L
Base	3 L	9 L	15 L

FINISH

APPLICATION

APPLICATION FIELD

Interior new surfaces made of concrete, plaster, brick, gypsum boards or old painted surfaces

Ideal for frequent painting / freshening up and areas that require clean and durable surfaces such as:

- Children's rooms, Schools, Nurseries
- Medical Practices, Hospitals, Maternity Clinics
- Hotels, Restaurants, Fitness Centers
- Food Storehouses

PREPARATION

Surfaces should be smooth, clean and dry, free from grease, dust, loose or flaking paint. Vista Plus is directly applied on already painted surfaces as long as the old paint is sound. To fill any cracks or holes use Acrylic Putty or Visto.

Old surfaces previously covered with water paints or distempers (lime wash or ceiling white) should be primed with Acrylan Unco Eco or Durovit.

New surfaces made of plaster, concrete, cement, plasterboard, etc. should be first primed with 100% Acrylic Primer or Acrylan Unco Eco.

Surfaces stained from smoke, graffiti, coffee or any other kind of stain should first be primed with Blanco Eco or Vitosin.

STEPS

- 1** Dilute up to 10% with water and stir well before use.

- 2** Apply the first coat by brush, roller or airless spray gun.

- 3** Recoat after 3-4 hours.

TIPS

- Application at 5-35°C and <80% RH.
- Apply at least 0,155 L/m² (or 255 g/m²) in two coats to get antibacterial activity.
- In case paint integrity is damaged, reapply for recovering antibacterial activity.
- Don't dilute all the paint in the can but what you need for the daily application
- The product must be exclusively tinted through Vitex Coloring System in the

- recommended base.
- Tools must be cleaned immediately after use with water and if needed, with soapy water or detergent.
- Allow at least 3 weeks before cleaning and washing newly painted surfaces with Vista Plus. Wash gently with water using a soft sponge. In case of tough stains, use a mild colourless detergent or soapy water.

- Minimize paint wastage by estimating how much paint you will need.
- Recover unused paint for reuse.
- After paint application, seal the container and store it for future use.
- Do not dispose of liquid waste into ground water table. Unused paint requires special handling for safe disposal.

ADDITIONAL INFORMATION

VOCs (Volatile Organic Compounds)

"Interior matt walls and ceilings (Gloss≤25@60°)" VOC content limit **30 g/L**. Maximum VOC content **20 g/L** VOCs (ready for use product).

STORAGE

5°C-38°C
Maximum storage time 5 years from the production date in sealed containers under proper storage conditions.

PRECAUTIONS

This is a biocidal product (PT2). Guaranteed composition of biocidal substances: Silver chloride (CAS: 7783-90-6) 0,0020% w/w and 1,2-benzisothiazol-3(2H)-one (BIT)(CAS: 2634-33-5) 0,04% w/w. Contains biocidal substance 3-Iodo-2-propinylbutyl carbamate (IPBC) for the preservation of the dry film against the deterioration from fungi. This product helps to retain the painted indoor surfaces less contaminated by microorganisms, without the further use of disinfectants. There is always the risk for humans to get infected by microorganisms, through direct droplet air transmission among them or any other source. For more information, please refer to the technical data sheet and product safety instructions.
